Design *tokens*

The single source of truth for color, type, spacing, and shape — extracted from the live EN screens. Components consume the `--token` variables; never hardcode a hex.

01 Color

Warm ink-on-cream foundation. One brand action, one quiet accent, six semantic hues borrowed from the match lifecycle.

BRAND & ACTION

#C76A48

`--color-brand`
Primary CTA, brand action

#A04A2C

`--color-brand-strong`
Pressed / deep brand

#8A6B3A

`--color-accent`
Identity, eyebrows, links

#F4F0E8

`--color-text-on-brand`
Cream text on brand/dark

TEXT

#1a1a1a

`--color-text`
Primary ink

26,26,26 / 55%

`--color-text-muted`
Secondary / labels

26,26,26 / 42%

`--color-text-faint`
Dimmed / disabled

SURFACES & LINES

#F4F0E8

--surface-page

App background
(cream)

#ffffff

--surface-card

Raised cards (paper)

#161310

--surface-dark

Night-mode shell

#27241c

--surface-dark-2

Dark media / court art

BACKGROUND BLOBS — SIGNATURE AMBIENT LAYER (BLURRED 50PX, ~0.55 OPACITY)

#f3c79b

--blob-peach

Blob A · top-right

#cfe1d6

--blob-sage

Blob B · top-left

#e8c7d4

--blob-pink

Blob C · bottom-right

composite

All three over cream

SEMANTIC — SOURCED FROM MATCH LIFECYCLE STATES

#3E7A5A

--color-success

Open · accepting

#3C6079

--color-info

Full · locked-in

#8A6B3A

--color-warning

Just played · act now

#A23B2C

--color-danger

Cancelled · destructive

#C25A38

--color-live

Live now

#8C8478

--color-neutral

Closed · inactive

02 Type scale

Instrument Serif sets headlines & numerals; Inter carries every UI string. Two families, no exceptions.

DISPLAY — INSTRUMENT SERIF

--text-display-xl
96px · serif · countdowns

12:32

--text-display-l
44px · serif · hero titles

Padel *at Aspire.*

--text-display-s
26px · serif · card titles

Tuesday evening doubles

UI — INTER

--text-title
20px · 600 · screen titles

All your matches this week

--text-body-lg
15.5px · 600 · CTAs

Join this match

--text-body
14px · 400/500 · body

Accepting players — three spots still left for Tuesday.

--text-label
12.5px · 600 · controls

Casual · Mixed · 90 min

--text-caption
11px · 500 · meta

Padel In — Aspire Zone · Court 4 · 0.8 km away

--text-overline
10.5px · 600 · 0.2em · UPPER

NEXT UP

ENGLISH CHARACTER SET

DISPLAY — INSTRUMENT SERIF

font-display · weight 400 · roman & italic

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
abcdefghijklmnopqrstuvwxyz

Pack my box with five dozen
liquor jugs.

UI — INTER

font-ui · weights 400 / 500 / 600

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz

Regular Medium
400 · body 500 · emphasis

Semibold
600 · labels, CTAs

NUMERALS & FIGURES — TWO DELIBERATE TREATMENTS

DISPLAY FIGURES

font-display · Instrument Serif · italic accents

12:32_m 3/4

128

Big, expressive numbers — countdown clocks, spots filled, profile stats, calendar days. The secondary figure (units, denominator) goes *italic* for contrast.

FUNCTIONAL FIGURES

font-ui · Inter · font-feature-settings: 'tnum'

Matches played	147
Win rate	68%
Per player	€12.00
Distance	0.8 km

18:30

Lvl 2-4

90 min

Any number in a list, table, meter, or time chip uses **tabular figures** so digits stay column-aligned and don't jitter when values update.

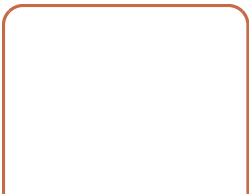

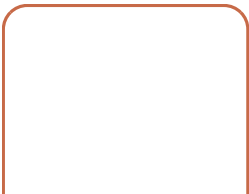

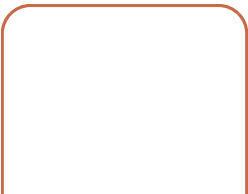

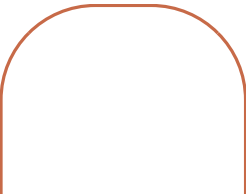

03 Spacing

4px base unit. Card padding lands on 20–24; gaps on 8–14; screen rhythm on 32+.

--space-1	4px	
--space-2	8px	
--space-3	12px	
--space-4	16px	
--space-5	20px	
--space-6	24px	
--space-8	32px	
--space-10	40px	
--space-12	48px	

04 Radius

Soft, generous corners. Buttons & chips are fully pillied; sheets get the big 28.

				
--radius-sm	--radius-md	--radius-lg	--radius-xl	--radius-pill
10px · inputs, tiles	12px · buttons, segmented	14px · cards	28px · bottom sheets	999px · pills, avatars

05 Consume it

Drop the variables on :root, reference them everywhere. The JS object mirrors them for styled-in-JS files.

```
/* tokens.css — import once at the app root */
:root {
  /* brand */
  --color-brand: #C76A48;
  --color-accent: #8A6B3A;
  --color-text: #1a1a1a;
  --surface-page: #F4F0E8;
  --surface-card: #ffffff;
  /* ambient blobs */
  --blob-peach: #f3c79b;
  --blob-sage: #cfe1d6;
  --blob-pink: #e8c7d4;
  /* semantic */
  --color-success: #3E7A5A;
  --color-warning: #8A6B3A;
  --color-danger: #A23B2C;
}

/* numerals: display = serif (italic accents); */
/* functional = Inter w/ tabular figures */
.figure-display { font-family: var(--font-display); }
.figure-tabular { font-feature-settings: 'tnum'; font-variant-numeric: tabular-nums; }

// tokens.js — for the .jsx screens (styled-in-JS)
export const tokens = {
  brand: '#C76A48', accent: '#8A6B3A',
  text: '#1a1a1a', surface: '#F4F0E8', card: '#fff',
  success: '#3E7A5A', warning: '#8A6B3A', danger: '#A23B2C',
  blobs: { peach: '#f3c79b', sage: '#cfe1d6', pink: '#e8c7d4' },
  radius: { sm: 10, md: 12, lg: 14, xl: 28, pill: 999 },
  space: { 1: 4, 2: 8, 3: 12, 4: 16, 5: 20, 6: 24, 8: 32 },
};
```

Note: the app currently ships `--color-accent` as a per-user tweakable (defaults around #8A6B3A). Keep `--color-brand` fixed for action affordances so “tappable” stays learnable.
