

The match *lifecycle*.

From a fresh player's first home screen through hosting, editing, and cancelling a match — every state, in order, with notes on intent and key interactions. Designed for the Connect iOS app, May 2026.

SCREENS	STATES	BRANCHES	PLATFORM
8 <i>distinct</i>	10 <i>total</i>	1 <i>fork</i>	iOS

SCREEN 01 · FIRST-TIMER HOME

SECTION A · FIRST IMPRESSION

01
First-timer *home*.

The first frame a brand-new player lands on after onboarding. Empty state with one clear nudge — find a match or create your own. No data, no clutter.

GOAL

Get the user to their first match. No analysis paralysis.

PRIMARY CTA

Create a match → Step 03

SECONDARY

Browse near me — join an existing match

NEXT STATE

Player home — once any match is touched

SECTION A · EMPTY STATE

SCREEN 02 · PLAYER HOME — NO MATCH YET

SECTION B · BROWSE · NO MATCH

02

Player home · *no match yet.*

The signed-in 2-player view when the user isn't hosting anything. The "Create a match" CTA is the visual focus; recommendations sit below for one-tap discovery.

HERO CTA

Create a match → Step 03

BELOW THE FOLD

Suggested matches near them

TABS

Home · Browse · Inbox · Profile

RETURNS TO

This view after every flow

SECTION B · BROWSE

SCREEN 03 · CREATE A MATCH

SECTION C · HOSTING — FORM

03

Create a *match.*

The host's form. Sport, location, time, level and number of players. Most fields auto-suggest from the user's profile, so a typical match takes 4 taps to publish.

FIELDS

Sport · Location · Date & time · Level
· Players

DEFAULTS

Sport & level from profile (Q2 + Q3)

SUBMIT

Create & share → Step 04

CANCEL

Back to home — no draft saved (v1)

SECTION C · HOSTING

SCREEN 04 · MATCH CREATED

04

Match *created.*

A confirmation moment with the match summary, an invite-friends shortcut, and a quiet handoff back home. We deliberately avoid celebration overload — this is a recurring action.

PRIMARY CTA

Invite friends — native share sheet

SECONDARY

Back to home → Step 05

TERTIARY

Copy link · Manage match

STONE

Quiet confidence — no confetti

SCREEN 05 · PLAYER HOME — HOSTING

SECTION B · BROWSE — WITH STATE

05

Player home · *hosting*.

Same player home as Step 02, now with a live "you're hosting" card pinned to the top. Tap it to jump into the match-details view to edit, manage, or cancel.

NEW ELEMENT

Hosting card pinned above the fold

TAP TARGET

Whole card → Step 06

STATUS PILL

Players joined · Spots left

BELOW

Same browse feed as Step 02

SECTION B · BROWSE — WITH STATE

SCREEN 06 · MY MATCH DETAILS

06

My match *details.*

The host's control panel. Edit any field inline, manage the player list, share the link, or cancel the match. From here the flow forks — save edits, or cancel outright.

EDITABLE

Time · Location · Level · Roster size

BRANCH A

Save edits → Step 07

BRANCH B

Cancel match → Step 08

LOCKED AFTER

Match start time — read-only thereafter

07 · 08

Saved *or* cancelled.

Two outcomes from the details screen. **Changes saved** is a quiet, dismissable confirmation — the host's still in control. **Match cancelled** is a firmer notice, since it affects everyone who'd joined.

SAVED · TONE

Quiet check + auto-dismiss in 3s

CANCELLED · TONE

Firm notice — manual dismiss

NOTIFICATIONS

Joined players are pinged on cancel

RETURNS TO

Home — hosting / no-hosting accordingly

SECTION E · LOOP CLOSED

09 · 10

Back to *home*.

Each branch lands back on player home. After a save, the hosting card is still there (with updated details). After a cancel, the card is gone — the user is right back where they started in Step 02.

AFTER SAVE

Hosting card stays · details updated

AFTER CANCEL

Hosting card removed — empty state

TOAST

"Changes saved" / "Match cancelled" briefly on top

RE-ENTRY

User can create another match any time

END OF DOCUMENT

That's the *match flow*.
